

I do not want to go back to getting all of those telemarketing calls. I work 2nd shift and these people were calling and waking me up. They start very early. I feel the federal government should just keep out of it. You say state government needs to be more independent. You cut federal funding to see that this happens so dont be pushing these people off on those of us who dont want them. I should have the freedom to choose, and I choose not to be bothered.
